Dark Bronze SRI-22

Musket SRI-31

Pine Green SRI-25

Terra Cotta SRI-43

Tile Red SRI-43

Colonial Red SRI-37

Retro Red SRI-42

Matte Black SRI-23

Matte Mansard Brown SRI-28

Definitive Matte Collection Kynar 500® PVDF Resin

The Definitive Matte Collection is a suite of Matte finishes, providing Designers with low gloss and low sheen solutions

Midnight Bronze SRI-24

Aged Bronze SRI-23

Sterling Mist SRI-41

Black Slate SRI-20

Balboa Grey SRI-23

Pebble Grey SRI-37

SRI values listed above are in accordance with ASTM E1980 and are based on actual testing (CRRC) Cool Roof Rating Council SRI values (CA Title 24, ENERGY STAR®) are based on the grouping of colors (color families). CRRC SRI values will differ, as each color is not tested in the color family option. Coatings are low gloss 10-15% sheen.

These printed chips provide a close representation of the colors. Metal Samples are available upon request. Custom colors available. "Oil Canning" is an inherent characteristic of roof and wall products, and not a defect, which is not a cause for panel rejection.

Vintage® SRI-19

Rustic Rawhide SRI-32

Vintage® is an innovative coating process over a G-90 metallic-coated steel surface. The process creates shade variations from light to dark, the lighter shade exhibiting a grey tone while the darker shade exhibits a bronze or brown tone. The dynamic, pre-aged appearance makes this a beautiful and durable product choice that is also graffiti resistant. Vintage® comes with a 20 year warranty. Warranty can vary by environment, see TMP website for more information.

NOTE: Due to the coating process, Vintage® has a color range. Color can vary from batch-to-batch and have directional variations. Due to color ranges, color matching of this product is not available.

Textured Rustic Rawhide finish provides an unmatched color experience with an engaging combination of color and texture. This textured finish features multi-toned weathered metal design in conjunction with a wrinkled paint system for optimum authenticity. The design interacts dynamically with light to recreate the feel of traditional oxidized metal while minimizing surface sheen.

Supported by a robust warranty. This color pairs beauty and performance. Request your sample today to interact with the stimulating color.

Weathering Materials

These materials change appearance overtime

general appearance before weathering

general appearance after weathering

Rusteel Plus™ is an ideal design for a historic, weathered look. Rusteel Plus™ is best suited for dryer, less humid environments. Rusteel Plus™ has no metallic coating and offers no warranty. The designer should be aware of rust runoff on decks and concrete without gutter protection or separation. Rusteel Plus™ meets ASTM A606-96 Type A. Type 4 has improved corrosion resistance when compared to carbon steel.

Bonderized

Bonderized steel is G-90 galvanized/metallic coated steel put through a phosphate bath, with a layer of Chromate applied and dried, leaving it ready to accept paint. Bonderized is often referred to as "Paint Grip," meaning that it is designed to be primed and painted in the field. Over time, Architects and Designers have begun selecting Bonderized for non-painted applications; they desire a dull gray appearance.

The Bonderizing process does not allow for a consistent pigment or color. The pigment can vary within the same coil batch. Taylor Metal Products cannot guarantee color/pigment of the panels will match within a single order. Bonderized steel has a tendency to scratch when formed and does not store well if wet.

elZinc Graphite®

elZinc Slate® SRI-18

Designed to endure, 99% pure/natural zinc is a long-lasting material that maintains its integrity over the life of the building. elZinc® doesn't require special maintenance during its long service life. In SLATE, the pre-weathered finish is achieved using a non-polluting phosphate treatment that preserves and respects the initial properties of zinc, while in GRAPHITE, it is pre-weathered to a very dark, almost black, shade of grey.

Real Copper
16 oz. and 20 oz. Copper
(please inquire)

Zinalume® Plus SRI-65
No finish warranty - 25 yr. perforation
warranty.

Zinalume® Plus AZ-55 is a 55% aluminum, 45% zinc.

Due to batch differences, color or spangle matching of this product is not available.

Galvanized G-90 SRI-65
Metallic coating over steel.
No finish warranty, no perforation warranty
